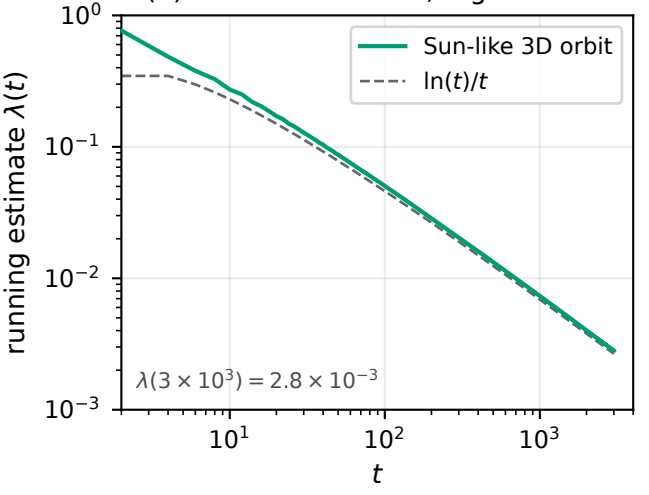
(a) Hénon–Heiles, $E = 1/8$
running estimate $\lambda(t)$
t
literature $\lambda \simeq 0.04$--0.08
$\lambda(3 \times 10^4) = 0.046$
orbit F (chaotic)
orbit E (regular)
$\ln(t)/t$



(b) MWPotential2014, regular orbit
running estimate $\lambda(t)$
t
Sun-like 3D orbit
$\ln(t)/t$
$\lambda(3 \times 10^3) = 2.8 \times 10^{-3}$
