(a) per-call wall-time, $N = 10^6$
wall-time per call (ms)
call index
call 0 = compile
jax eager CPU
jax jit CPU
jax eager TITAN Xp
torch eager TITAN Xp
jax jit TITAN Xp
jax eager H100
jax jit H100
(b) break-even, $N = 10^6$
cumulative time (eager calls)
number of calls
eager (any device)
jax jit H100 (compile + run)
break-even ≈ 94 calls
jax jit TITAN Xp (compile + run)
break-even ≈ 58 calls
jax jit CPU (compile + run)
break-even ≈ 2 calls
